ABOUT ME

Hi, I am **Ida Putu Sucita Danuartha**, you can call me **Danu**, I'm a fresh graduate from a vocational high school and currently studying at Primakara University majoring in informatics, faculty of information technology and design.

I first started to know about the world of technology in July 2021 and the technologies that I learned at that time were HTML and CSS. The first month was a difficult time for me to be able to learn something that I had never studied before, but with enthusiasm, motivation and my interest in the world of technology was so high that it allowed me to survive until now.
